

agent green™

PHOSPHATE REMOVER

Where other phosphate removers fail is their lack of *speed*. Speed is what it takes to remove phosphate from the water column as well as absorbed phosphate. Agent Green has the speed to remove phosphate faster than it can accumulate.

1. Seals and removes phosphates
2. Unmatched removal speed
3. Draws out absorbed PO₄ from media
4. Traps suspended particles
5. Safe for all fish, corals, and inverts

Size	Treats
118 ml	4,731 L (1,250 gal) @ 1ppm
236 ml	9,463 L (2,500 gal) @ 1ppm
473 ml	18,927 L (5,000) gal @ 1ppm
